

Scientific Programme

- 8.00 Registration**
- 8.30 Opening Ceremony**
- 9.00 Plenary Session 1: Clinical aspects**
Chair: Luigi Greco - Umberto Volta
- 9.00 Evidence based criteria for coeliac disease diagnosis**
Steffen Husby
- 9.30 Genetics: HLA and non HLA risk factors for coeliac disease: implications for the clinician**
Cisca Wijmenga
- 10.00 The association of coeliac disease with autoimmune disorders: the model of type I diabetes**
Riccardo Troncone
- 10.30 Refractory coeliac disease**
Antonio Di Sabatino
- 11.00 Coffee break**
- 11.30 Plenary Session 2: Treatment and prevention**
Chair: Salvatore Auricchio - Mariateresa Bardella - Gino R. Corazza
- 11.30 Gluten-free diet: does it bring only positive effects?**
Pekka Collin
- 12.00 Future options for treatments alternative to the gluten free diet**
Alessio Fasano
- 12.30 Cohorts at risk for coeliac disease: implications for prevention**
Marian Rewers
- 13.00 How to foster research in coeliac disease: the example of the Dutch consortium**
Frits Koning
- 13.30 Lunch and Poster Session**
- 15.00 Plenary Session 3: Round Table on "The present and future of the gluten-free diet"**
Chair: Carlo Catassi
- Gluten threshold: how many ppm?**
Carlo Catassi
- New Gluten free ingredients**
Stefania Iametti
- Oats : a new ingredient in a coeliac diet**
Markku Mäki
- Novel approaches in the design of gluten free cereal products**
Stefano Renzetti
- Gluten free beer and other beverages**
Elke Arendt
- Exploitation of the metabolic potential of lactic acid bacteria for improved quality of gluten free bread**
Marco Gobbetti
- 16.30 Coffee Break**
- 17.00 Plenary Session 4: Oral presentations**
Chair: Antonio Calabrò - Paolo Lionetti
- 18.30 Evaluation test for Italian Participants (ECM)**
- 18.45 End of the Meeting**

International
Coeliac Meeting
Disease

Genoa
19 September 2008

Associazione Italiana Celiachia

Presentation

The annual conference of the Association of European Coeliac Societies will be organized together with an International Coeliac Disease Meeting, which will be held in Genoa on 19th September 2008.

The programme of this meeting, with the participation of many eminent speakers, appears to be outstanding for researchers involved in the field of Coeliac Disease. During the meeting, organised in plenary sessions, famous scientists investigating many aspects of the disease will discuss important issues with the leaders of all the European patient organisations with the aim of improving the quality of life of coeliac patients.

Topics of the International Coeliac Disease Meeting will be clinical aspects of the disease (including advanced criteria for the diagnosis, genetic risk factors, association with autoimmune disorders, refractory coeliac disease) and its treatment (with particular attention to the positive and negative effects of the gluten free-diet, future options for an alternative treatment, implications for prevention of the disease).

Scientists and leaders of patients' organisations will learn how to foster research on Coeliac Disease following the example of the Consortium created in some European countries for research development.

Practical problems of great topical interest will be discussed during the round table on the present and future of the gluten-free diet.

The latest advances in research will be presented by the most well-known experts and also by young researchers from the most important European Universities in the oral and poster presentation session with an informal discussion which will provide significant information for coeliac people.

We hope that this Meeting will provide many new insights and challenges for all scientists and experts who are involved in coeliac disease research, providing the best results for improving the quality of life of coeliac patients.

ADDRESSED TO

Primary care physicians, Internal Medicine specialists, Gastroenterologists, Pediatricians, Dietitians, Nutritionists, Pathologists, Laboratory Medicine specialists and Biologists.

President of the Meeting

Prof. Umberto Volta
*Department of Gastroenterology and Internal Medicine
S. Orsola Malpighi Hospital, University of Bologna
Bologna, Italy*

Co Presidents

Prof. Carlo Catassi
*Department of Pediatrics, Università Politecnica delle Marche
Ancona, Italy
Center For Celiac Research University of Maryland School of Medicine
Baltimore, USA*

Prof. Riccardo Troncone
*Department of Pediatrics and European laboratory
for the Investigation of Food Induced Diseases
University Federico II
Naples, Italy*

Scientific Secretariat

Antonio Calabrò
*Gastroenterology Unit
University of Florence – Careggi Hospital
Florence, Italy*

Carlo Catassi
*Department of Pediatrics, Università Politecnica delle Marche
